EDUCATION

2026 - 2029
BACHELOR'S DEGREE IN SOFTWARE ENGINEERING
- Currently in the 2nd semester at Centro Universitário UDF

2026
PROGRAMMING LOGIC COURSE
- Escola do Futuro do Goiás (EFG)

2022
ENGLISH COURSE
- FISK Language Center

LANGUAGES

- Portuguese: Native
- English: Advanced
- Spanish: Basic

SKILLS

Soft skills:
- Fast learner / Self-taught
- Analytical and logical thinking
- Attention to detail
- Clear written and verbal communication
- Adaptability

Hard skills:
- Python
- MySQL and Database Modeling
- Prompt Engineering and AI tools (Claude, ChatGPT, Gemini)
- Git & GitHub
- HTML5, CSS3, JavaScript, React, Bootstrap 5
- Figma, Miro, BPMN, UML

PROFESSIONAL OBJECTIVE

Software Engineering student (2nd semester) seeking an internship opportunity in fintech and data. Experienced in Python, SQL (MySQL) and database modeling, with hands-on use of AI tools such as Claude and ChatGPT for research, coding, documentation and productivity. Genuinely interested in payments and how complex financial systems work, I enjoy solving problems, learning fast and contributing to collaborative environments.

ACADEMIC PROJECTS

Re-Cicle – E-Waste Disposal Application (1st Sem/2026)
- Process mapping in BPMN and UML diagrams (Use Case and Activity diagrams).
- Workflow organization in Miro and UI/UX interface prototyping in Figma.
- Used AI tools (Claude, ChatGPT) for research, documentation and requirements analysis.

Web Portfolio & Front-End Projects (2nd Sem/2026)
- Development of responsive web applications and landing pages (PetCÃO, Entre Páginas, Olho Vivo) with HTML5, CSS3 and Bootstrap.
- Implementation of anchor navigation, dynamic components (modals, carousel, accordion), and adaptive layouts.

Algorithms in Python (2nd Sem/2026)
- Implementation of Kaprekar's Constant algorithm in Python, featuring data validation and digit sorting logic.
